

***** Result for Image/Page 1 ***** Computer Organization MCQ Infeepedia Assignment-til Computer Organization MCQ -1" Flynn's Taxonomy classifies computer architectures based on: (A) Number of processors and Memory units (D) of instructions and data streams (C) Speed of processing (D) More than one of the above (E) None of the above 2. Which of the following is NOT category in Flynn's Taxonomy? (A) SISD (B) MIMD qn.41SD More than one of the above (E) None of the above An example of SIMD architecture is: A vector processor (B) A multi-core processor.. (D) More than one of the above (E) None of the above 20 By: Infec Tripathi 53b 4. 6. kB;c) Which nn's taxonomy category corresponds to parallel computers? MIMD (B) SIMD (C) SISD (D) More than one of the above (E) None of the above Which category does a traditional uniprocessor belong to in Flynn's Taxonomy? U)61SD (B) SIMD (C) MIMD (D) More than one of the above (E) None of the above Which of the following is a characteristic of RISC architecture? U"ewer instructions (B) Simple instruction set (C) Fixed instruction length (D) More than one of the above (E) None of the above Subscribe Infeepedia youtube channel for computer science competitive exams Download Infeepedia app and call or wapp on 8004391758

***** Result for Image/Page 2 ***** 2 Infeepedia Computer Organization MCQ n RISC architecture, instructions are generally: (A) Complex (C) Variable in length (D) More than one of the above (E) None of the above By: Infee Tripathi 8. (89 CISC architecture typically has: (A) Fewer instructions UBrfiöie instructions (C) Variable instruction lengths (D) Moie than one of the above (E) None of the above CDS C 9. AVhich Of the following is a major advantage of RISC over CISC? (A) Lower power consumption Faster instruction'execution (C) Simpler hardware design than one of the above (E) • None of the above 10. A key feature of CISC architecture is: (A) Use of a large number of addressing modes UB)Gomplex microprogramming (C)v Variable instruction length (D) More than one of the above (E) None of the above I. Machine instructions typically indude: UAfiperation code (Opcode) SUB) Operands (C) Instruction format than one of the above (E) None of the above Which of the following are examples of arithmetic instructions? (A) ADD (B) SUB (C) MUL JgYM" ore than one of the above (E) None of the above Subscribe Infeepedia youtube channel for computer science competitive exams Download Infeepedia app and call or wapp on 8004391758

***** Result for Image/Page 3 ***** Computer Organization MCQ 13. Branch instructions are used for: c (A) Arithmetic operations (B) Data transfer (C) Changing the flow of execution onvlore than one Of the above (E) None of the above Infeepedia By: Infee Tripathi 00 Nuq__ Thup 14. A machine instruction is executed in which phase of the instruction cycle? (A) Fetch (B) DeCode (D): More than one of the above (E) None of the above 10 . 15/ Which instruction type transfers data tom memory to a processor register? (A) Arithmetic instruction (B) - Control-Instr,uétion (C) ata transfer instruction (D) More than one of the'above (EY None of the above IGÄhe'instruction cycle consists of: (A)' Fetch (B) Pecode (C) Execute KcßcC re than one of the above (E) None of the above 07. Which step cOmés first in the instruction cycle?

(A) Decode (B) Fetch (C) Execute (D) More than one of the above (E) None of the above 18. During the fetch phase, the CPU: (A) ss_MFetches the instruction from memory (B) Decodes the instruction (C) Executes the instruction (D) More than one of the above (E) None of the above 9. The instruction cycle ends after the: (A) Execute phase (B) Fetch phase (C) Decode phase (D) More than one of the above (E) None of the above

***** Result for Image/Page 4 ***** By: Infce Tripathi Computer Organization MCQ (C) Decode phase (D) More than one of the above (E) None of the above 20. The purpose of the decode phase is to: (A) Interpret the fetched instruction data into registers (C) Execute the operation (D) More than one of the above (E) None of the above 2. An instruction format defines: The structure of an instruction (B) The opcode and operands (C) The memory addresses involved (D) More than one of the above (E) None of the above 23. In a typical instruction format, the operand field contains: (A) Operation code (B) Data to be processed (C) Addresses of data or register (D) More than one of the above (E) None of the above 2. A two-address instruction format typically has: (A) Two operands (B) One operand (C) No operand (D) More than one of the above (E) None of the above Which format is used for loading data into a register? (A) Zero-address instruction (B) One-address instruction (C) Two-address instruction (D) More than one of the above (E) None of the above Subscribe Infepedia youtube channel for computer science competitive exams Download Infepedia app and call or wapp on 8004391758

***** Result for Image/Page 5 ***** Computer Organization MCQ 26 In a single accumulator organization: (A) One accumulator register is used (B) Two accumulators are used (C) Data is loaded directly into memory (D) More than one of the above (E) None of the above General register CPU organization: Infepedia By: Infce Tripathi (A) Utilizes multiple general-purpose registers (B) Only uses an accumulator (C) Uses a single program counter (D) More than one of the above (E) None of the above Stack-based CPU organization uses: (A) General-purpose registers (B) Stack (C) Multiple accumulators (D) More than one of the above (E) None of the above 29. Which CPU organization is most suited for high-level language support? (A) General register organization (B) Accumulator organization (C) Stack organization (D) More than one of the above (E) None of the above 30. Which CPU organization typically uses two-operand instructions? (A) General register organization (B) Accumulator organization (C) Stack-based organization (D) More than one of the above (E) None of the above 31. Which of the following describes a Von Neumann architecture? (A) Single memory for instructions and data (B) Separate memory for instructions and data (C) Single control unit (D) More than one of the above (E) None of the above Subscribe Infepedia youtube channel for computer science competitive exams Download Infepedia app and call or wapp on 8004391758

***** Result for Image/Page 6 ***** By: Infce Tripathi Infecpedia Computer Organization MCQ 32. • A Harvard architecture typically has: Uβeparate instruction and data memory (B) Unified instruction and data memory (C) Multiple control units (D) More than one of the above (E) None of the above 3 . Which architecture is most commonly used In modern processors? ".98 on Neumann (B) Harvard SISD (D) More than one of the above (E). None of the aboveV 34. Which of,the following describes a superscqlar archltcturet (A) Can issue multiple instructions per clock cyclg__ time 4C)øOses multiple pipelihes (D) More than one of the-above (E) None Of the 'aboVe 35. In a pipelined architecture, which'stage overlaps With Instruction fetch? (A) k Execute (B) Decode (C) f Write-back ore than one of the above (E) N6rieof the above . A zero-addressinstruction format uses: (A o operand±'fr B) One operand (C) TWO operands (D) More than one of the (E) None of the above 37. The one-address instruction format Is plcally used in: oJ•heM ••ygtack-based CPUs (B) Accumulator-based CPUs (C) General register-based CPUs (D) More than one of the above (E) None of the above Subscribe Infecpedia youtube channel for computer science competitive exams Download Infecpedia app and call or wapp on 8004391758

***** Result for Image/Page 7 ***** 'Computer Organization MCQ 38. The two-address instruction format: (A) Has two operand addresses ses an accumulator (C) Requires a stack (D) More than one of the above (E) None of the above Three-address instruction format: (A) Has three operands (B) Requires a stack JCPStores results in a register (D)' More than one of the above Infecpedia By: Infce Tripathi None of the 40. •tWhich of the following fields is not typically part df an instruction format? (A) Opcode "rarids rogram_cöünterm (D) More than one of the above t (E) •None of the above Subscribe Infecpedia youtube channel for computer science competitive exams Download Infecpedia app and call or Wapp on 8004391758
